

Q:

Why should you be excited about your next colonoscopy?

A:

Because our physicians get the **BIG** picture.

Colonoscopy saves lives. Full Spectrum Endoscopy™ (Fuse™) is revolutionizing colonoscopy by providing a full 330° view of the colon, almost double the view of standard scopes. A study recently published in The Lancet Oncology revealed that Fuse™ found 76% more polyps than standard scopes.

Bronson South Haven is among the first in Michigan to offer this leading-edge technology to our patients.

Insist on Fuse™ Colonoscopy.

To schedule a Fuse™ colonoscopy, call Bronson South Haven Surgery Services at **269.639.2893**.
